

PRE-WET PACKAGES

We offer options **available for all truck sizes**

- Hydraulic and electronic drives available
- Configurable to work with Muncie Power Products snow & ice systems as well as other systems on the market
- Open and closed loop models available in most configurations
- All products have proportional electronic control for greater accuracy
- Flow turbines available with most configurations for greater precision

SNOW & ICE DIVISION

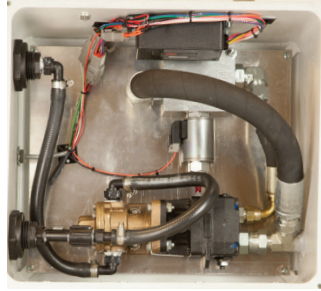

HYDRAULIC PRE-WET

- 15 GPM max Hydraulic flow(Muncie provided valve)
- Independent hydraulic or auger exhaust options available.
- Flow Sharing Option Available for Advantage Plus systems
- 10 GPM maximum liquid flow (10H and 10HX options)
- 100 PSI maximum liquid pressure (10H and HX options)

Hydraulic Pre-Wet Part Number:
AP-LIQ-1-ASM-M-XX

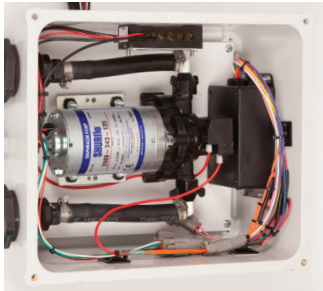

Hydraulic Pre-Wet Part Number:
AP-LIQ-1-ASM-10HX-FT

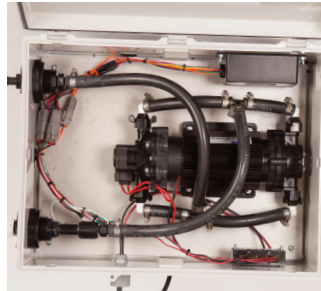

Hydraulic Pre-Wet Part Number:
AP-LIQ-1-ASM-10H-XX

ELECTRIC PRE-WET

- 2 Models available 3 GPM (10 Amp) and 6.25 GPM (20 Amp).
- 45 PSI maximum output pressure

Electric Pre-Wet Part Number:
AP-LIQ-1-ASM-03M-FT

Electric Pre-Wet Part Number:
AP-LIQ-1-ASM-06M-FT

MODEL NUMBER CONSTRUCTION

AP - LIQ - 1 - ASM - 03M - FT

AP – Advantage Plus

NC – No Controls
NX – Advantage System
MP – MESP 300 (Future Development)

LIQ – Liquid System

Revision

FT – Flow Turbine (Adv+ Only)
XX – Open Loop

M – Electric (Electric Motor Not Supplied)
03M – 3 GPM Electric Motor
06M – 6 GPM Electric Motor
H – Hydraulic (Pump/Motor assembly not supplied)
10H – Hydraulic Motor (10 GPM Liquid Flow)
10HX – Plumbed Though Auger Exhaust (10 GPM Liquid Flow)

ASM – Installed in Enclosure
INS – Installed in Cabinet
LOS – Loose Parts
