

REVOLUTIONARY CONTROL

ADVANTAGE+[®] SNOW & ICE SYSTEM

ADVANTAGE+[®] SNOW & ICE SYSTEM

The Advantage+ system increases reliability and revolutionizes the way in which your fleet is operated and maintained. With features like touch screen controls, GPS datalogging and WiFi support links, we're changing the game—big time.

WiFi   ANDROID  GPS

ERGONOMIC CONTROL DESIGN

The Advantage+ controls have been designed to be intuitive for the operator. The control panel uses a vivid color touch screen that creates easily readable displays. System settings are simple to understand and adjustable from the touch screen. This compact design doesn't block access to other controls and simplifies the installation process.

CONNECTS OUR TEAM TO YOUR TRUCK FOR REAL-TIME SUPPORT.

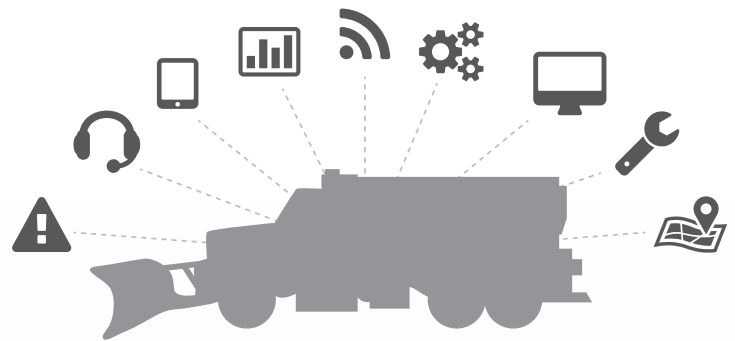

ADVANCED GPS DATA-LOGGING

Fleet manager data-log report software provides organized reports with filtering capabilities for compiling information. Options allow you to overlay the truck route to monitor where the truck has traveled, spreader rates and totals, and more.

REAL-TIME WI-FI SUPPORT LINK

All of the advantages of having factory support on-site in a matter of minutes. The Advantage+ is equipped with Wi-Fi and an app on its touch screen that connects your truck to Muncie engineers through a dedicated web server.

An app is available for Android Devices. Supervisors can use the app to access and change system settings, view remote operations and more. The app is beneficial for system setup, troubleshooting and datalogging.

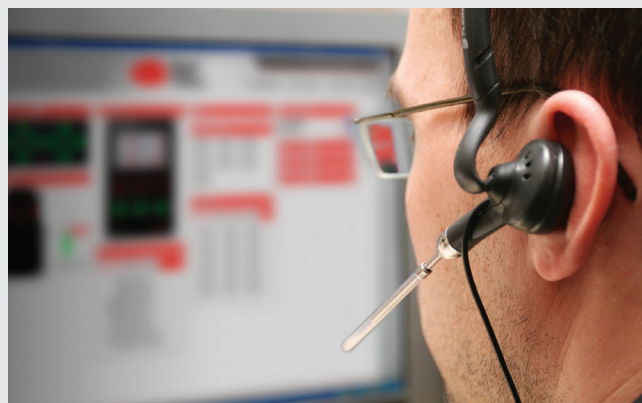

SIMPLY BETTER TECHNOLOGY

CARTRIDGE VALVE DESIGN

Cartridge valves are the premium design solution for hydraulic circuit development. Manifolds reduce hose connections and along with cartridge valve choices can greatly reduce operational issues due to contamination. From a maintenance standpoint, cartridge valves can be serviced in minutes and at a fraction of the cost of servicing and replacing stack valves.

WE BUILD TRUST.

At Muncie Power Products
it's about more than building
hydraulic components; its
about building trust.

NEED HELP?

Please contact our Snow & Ice Department for product related questions, or visit online for additional product information, support literature and more.
