

# HYBRID CONTROL SOLUTIONS

PRECISION OF CARTRIDGE VALVES WITH THE FLEXIBILITY OF STACK VALVES

## KEY FEATURES

- Pair up to 8 sections for optimal control for any application
- Frame-rail or behind-the-cab (shown) configurations available
- Compact solutions for ease of installation and service
- High-flow sections available for faster hoist speeds for large telescopic cylinders
- Cable, air, or electric actuated
- Pre-compensated load sense design
- Ideal for Class 7-8 chassis
- Pair with a PTO, pump, and tank for a complete system
- Compatible with any Muncie Power control system

PRECISION  
OF CARTRIDGE  
VALVES WITH  
THE FLEXIBILITY  
OF STACK  
VALVES

### MAX. FLOW RATE

Pre-Wet Flow (Proportional)	10 GPM
Auger Flow (Proportional)	15 GPM
Spinner Flow (Proportional)	15 GPM
Stack Valve Functions	32 GPM

MAX. SYSTEM PRESSURE      3,000 PSI (207 BAR)  
Factory Setting      2,500 (172 BAR)

## SIMPLE TO INSTALL & EASY TO SERVICE

The behind-the-cab option features a vertical design that allows the enclosure to fold down, making hose access easier when servicing your system. This design also accommodates custom mounting configurations.
