

MUNCIE POWER PRODUCTS

Product Bulletin #00056

Subject: RM1 PTO Availability

Date: Effective May 25th, 2018

URL: www.munciepower.com

The RM1 has been re-released for sale, effective May 25th, 2018.

The RM1 series will not be assembled on our standard assembly line, which will result in lead times of 7-10 business days, or as parts availability allows. A price adjustment will be implemented on all new RM1 orders. All BB, CC, & XF output shafts will share a common list price.

The RM1 carries a 128 HP \ 675 lb.ft intermittent torque rating while turning crankshaft rotation at 128% of engine speed.

The GB1 Series gearbox is also available, and can be ordered using the P/Ns below. The GB1 is a 2:1 reduction gearbox that reduces output RPM by 50%. The output is a 1.25" round keyed shaft with 5/16" keyway. The GB1 results in a 200 lb. ft. rating and turns opposite rotation.

GB1B-205-125A SAE "B" input/ 1.25" round keyed output
