Product Bulletin #00073

Subject: "2" Shift Option for 2019 GM & International

Date: June 28, 2019

URL: www.munciepower.com

A shift option has been added for 2019 (and later) GM 4500-6500 and International CV series trucks. The "2" shift option was created to include the proper "plug and play" wiring harness, transmission lube tee, and all the essential mounting hardware unique to the chassis.

This option will only be used with CS6B-A67**-2**P PTO's. The ratios that will be compatible will be 03, 04, 05, and 07. PTO's ordered with the "2" shift code will always require the "P" special feature.

The installation kits that are compatible with this new shift option are as follows:

- CS6B-A67**-21*P (Only ratios 03, 04, and 05)
 - o Activation Kit P/N: 48TK6497
- CS6B-A67**-23*P (Only ratios 03, 04, and 05)
 - o Activation Kit P/N: 48TK6498
- CS6B-A6707-21*P (Only ratio 07)
 - o Activation Kit P/N: 48TK6495
- CS6B-A6707-23*P (Only ratio 07)
 - o Activation Kit P/N: 48TK6496

The new shift codes have been published on application page ALLI-15 (REV 06-19)
