2 Metric stud kit included.

The 2 base models have different through shaft torque ratings, SS88-14X5 is rated to 14,000 lb.ft. and the SS88-21XC is rated to 21,000 lb.ft. The through torque does not affect the PTOs used. This application page applies to both models. The PTO drive gear is rated to 1,200 lb.ft. of intermittent torque.
Add suspension bracket kit P.N. 299K2870000, sold separately.
